Comments: I am representing a group of Indian wooden product manufacturers who are keen to establish long-term supply relationships with US exporters of logs and lumber. They have been buying some lumber from local importers. They would like to buy directly from the US rather than through importers as their requirements have been increasing rapidly and are expected to increase significantly, given the restrictions on wood availability from local sources in India.

Address: 4th Floor, Jeevandeep Building., 4th Mile, Salugara, Siliguri

Province/Region: WEST BENGAL

Zip: 734008

Country: India

Products Requested: We are a mass timber manufacturing company. We are interested in procuring Southern Yellow Pine wood. We require high-quality wood that meets our stringent standards for construction and mass timber production.

Could you please provide us with the following information:

- grades of SYP available, including their mechanical properties (e.g., bending strength, stiffness, density).
- Dimensions of the lumber (length, width, and thickness)
- Moisture content of the lumber
- Certification of sustainability (agency name, such as FSC, PEFC, etc.)
- Grade of the lumber (visual and machine grades details)
- Standard used for grading of timber
- Cost of timber per CFT (cubic foot)

Frequency: One Time

Origin Port: Port Everglades

Destination Port: Kolkata Port

Comments: Whether the resinous content of SYP can cause gluing problems, such as delamination, when using structural grade adhesives. If so, are there any special precautions or treatments recommended?
